

INSTA-VENT Blower

High performance Blower / Smoke Extractor

Instant smoke removal

Instant fumes removal

4 stroke petrol engine

Maximum air flow

No need of electricity

Easy to carry at site

INSTA-VENT blowers are a perfect solution for ventilation and extraction for a wide range of applications from industrial, sewage, fire and rescue etc. It is useful for providing ventilation as well as removal smoke and fumes in various situations. A powerful easy to start 4 stroke petrol engine ensures quick deployment and maximum air flow. You need not worry about availability of electric source in emergency situation.

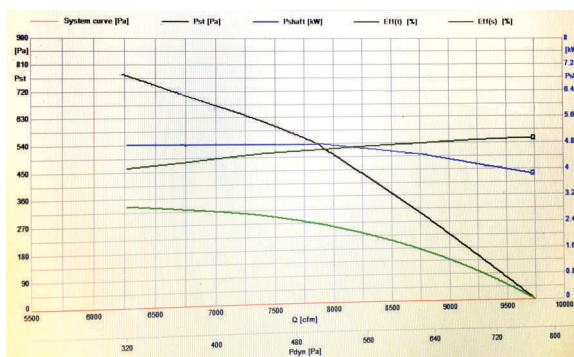

Specially designed aluminum fan blades for higher performance and long durability.

A convenient handle and strong rubber pads makes it portable and can be easily carried at site. It can be used with our without duct as per requirement. The body is made of Mild Steel which makes it sturdy to endure different scenarios.

Using proven Honda engines, you can be assured of after sales service and easy availability of spares all over the country.

INSTA-VENT Blower

Technical Specifications

Engine type	: Air cooled
Bore x Stroke	: 68 x 45 mm
Power output	: 4.8 HP (3.6 KW) @ 3600 rpm
Displacement	: 163 cm ³
Starting Mechanism	: Recoil Starter
Number of Fan Blades	: 7
Fan Blade Size	: 16 inches
Positive Flow	: 9300 cfm
Negative Flow	: 4600 cfm
Fan blade MOC	: Aluminum / PAC
Weight	: 30 kg approx.
